

Choose the correct Renold chain

RENOLDwww.renold.com

Use the table below to help choose the right chain for your application.
When it comes to choosing the right chain for the job, there are many elements to consider.

For general purpose use, choose from our range of **Transmission Chains**.
Here, wear, fatigue performance and suitability of use in high speed systems may be an important consideration.

If you require any extra assistance, do feel free to contact one of our experienced sales engineers by e-mailing shop.uk@renold.com

Feature/ environment	Wear performance	Fatigue performance	Hi speed drives suitability	Shock load resistance	General purpose	"Easy break"	Low maintenance	Food environment	Corrosive environment	Hi-abrasive environment	Damp/wet environment
